

How to re-key your SmartKey Security™ locks

you must have the working key to re-key the lock.

Current Key

SmartKey Tool

New Key

1

Insert the key that currently operates your lock, and rotate it 90° clockwise.

2

A Insert the SmartKey tool fully and firmly into the SmartKey hole.

B **Remove** the SmartKey tool and the current key.

3

A Fully insert your new key into the lock, and rotate it 180°.

B Rotate the new key 90° back to the starting position, and remove it. Your lock is now re-keyed to your new key, and your old key will no longer operate the lock.
